School-based health centers (SBHCs) are an innovative way to help ensure that children and youth have access to health care and do well in school. They are located on or very near school campuses and offer services in a place that is familiar, trusted, age-appropriate, and convenient for students and families. SBHCs are supported by many different communities because they respond to local needs. In 2000, there were 108 SBHCs; today, there are 293 and growing!
