

Northern Inyo County Local Hospital District

Board of Directors Special Meeting

Tuesday May 27, 2008; 1:10pm

Board Room Northern Inyo Hospital

NOTICE OF SPECIAL MEETING OF THE BOARD OF DIRECTORS OF THE NORTHERN INYO COUNTY LOCAL HOSPITAL DISTRICT

NOTICE IS HEREBY GIVEN that a Special Meeting of the Board of Directors of Northern Inyo County Local Hospital District will be held starting at 1:00 p.m. on Tuesday, May 27, 2008, in the Board Room at Northern Inyo Hospital, at 150 Pioneer Lane, Bishop, California.

The agenda for this Special Meeting is as follows:

- 1. Call to Order
- 2. Opportunity for members of the public to address the Board of Directors on items described in this Notice, and/or items of interest.
- 3. Approval of bids for shoring and underpinning for Phase II of the building project (action item)
- 4. Fiscal Year 2009 Proposed Annual Budget (action item)
- 5. Opportunity for members of the public to address the Board of Directors on any items of interest.
- 6. Adjournment.

Dated: May 23, 2008

Turner Construction Company 1211 H Street Sacramento, CA 95814 Phone: 916.444.4421 Fax: 916.444.9214

Mr. John Halfen Northern Inyo Hospital 150 Pioneer Lane Bishop, CA 93514

Subject: Bids received for shoring and underpinning at Phase II

Dear Mr. Halfen,

Turner Construction has received two bids from qualified firms for the work described as Shoring and Underpinning for work associated with the construction of the new hospital building at the completion of the demolition of the 1949 building.

Bids were received from:

Schnabel	Foundation	Company
Q CILLING CI	- Culture	-curpunt,

3075 Citrus Circle, #150

Walnut Creek, CA 94598

Base Bid Alt. #1 \$190,162.00 \$11,000.00

Alt. #1

Not Bid

Engineers Stamp

Included

Total

\$263,922

After interviewing the low bidder, Schnabel Foundation Company it was determined they have included a complete scope of work and is deemed to be the low responsible bidder for this work. Turner Construction recommends awarding a contract to Schnabel Foundation Company by Northern Inyo Hospital for the proposed work.

Schnabel is in the process of determining the exact cost for having a licensed structural engineer stamp their shoring design documents. They normally have their designs stamped by a registered and licensed Civil Engineer but for this project OSHPD requires the design be stamped by a licensed Structural Engineer. Turner has estimated \$10,000 for this as shown above but we anticipate the cost will actually come in less than this amount. The final contract to Schnabel will be adjusted accordingly once this information is available.

Turner Construction Company 1211 H Street Sacramento, CA 95814 Phone: 916.444.4421 Fax: 916.444.9214

Turner requests your approval to issue a Notice To Proceed as soon as possible so that the engineering and design of the shoring system can be started.

This is considered a design-build contract and the design from Schnabel will be delivered to the project Architect for incorporation into the Demolition and Abatement OSHPD set of documents in order to receive the OSHPD Demolition permit for the 1949 Building.

Should you have any questions please contact us.

Sincerely,

Arlen Arnold
Project Executive

Turner Construction Co., Inc.

Part 1 - 4 Parameters of Subcontract Proposal (Applies to all Trades) Attachment B

All requirements and services identified in the Trade Contractor Procedures Manual, dated September 11, 2006, Revised September 26, 2006 are part of these documents (permits, labor, EEO, temporary power, temporary water, trash, toilets, storage, line and grade, hoists, safety etc.) Subcontractor reverves The right to review this manifal Parameters of Subcontract Bids:

2.

The form of Subcontract is the Trade Contractor Agreement, Item No. 07 in the bid book, without modification. Any exceptions to the terms and conditions will be grounds for rejection of the bid. - Subcontract shall be per Turner/Schnabel nationwill

If a particular item of work appears to be included in more than one bid package, the bidder shall ensure that they have covered this item (s) of work and shall not assume that b. it is/covered/by another bid package. Bidders are responsible for all items of work in their attachment By except as modified on Attack, A or by Sugrantractors proposal

Attachment B, Scope of Work, Part 5 takes precedence over any notation on the Ċ. drawings or in the specifications as to the responsibility of which bid package any item of work is included in.

Bidders are assumed to be knowledgeable of this type of work and shall include all d. normal requirements to produce a complete system ready for its intended use as described by these documents - Enauge

The Contract Documents are presented as complete and with the intention to provide a e. complete system. Any discrepancies or omissions shall be brought to Turner's attention prior to bid. Where discrepancies in the bid documents do exist, the more stringent requirement shall apply.

f. Bidders are encouraged to make a site tour and become familiar with the site and existing conditions prior to bidding. .

Provide unit prices, alternate prices, and breakout prices as requested on the Bid Form. g.

Allowances requested in Part 5 of the attachment B are exclusive of overhead and profit. These amounts will be deducted from the contract amount via a deductive change order immediately upon contract signing. The amounts in these allowances will be utilized at Turner's sole discretion.

Your base lump sum proposal is to be based upon Turner withholding a 10% reserve from the monthly progress payments. Final payment will be made as described in the Trade Contractor Agreement and the Trade Contractor Procedures Manual Additionally, Turner will withhold an additional 7% from the monthly progress payments for all subcontractors not having a permanent place of business as required by the California Revenue and Taxation Code Section 18662. Subcontractor payment applications are due on the Project Superintendent's desk by the 20th day of the month, projecting work completed through the end of the month.

Work is to be performed in accordance with Turner's construction schedule. corresponding Schedule of Values (see the Subcontractor Procedures Manual) will be required from the Subcontractor within 14 days of award of the subcontract. 🗴 k.

At least one of your key personnel on site shall be OSHA 30 hour certified within the past three years. If not, your proposal is to include the cost for the Turner/OSHA 30-Hour Safety Certification training course via The Turner Knowledge Network (TKN),

1) The cost is four hundred ninety-five dollars (\$495.00) per person plus the cost of

Page 1 of 3

h.

TURNER CONTRACT #: 1286000

Attachment B Part 1 – 4 Parameters of Subcontract Proposal (Applies to all Trades)

the time, 30 hours, for the training.

- Your supervisory staff will be required to show evidence of this certification no more than three (3) months after written notification of award.
- Detailed instructions explaining how to register and take the course will be attached to your written notification of award.
- Failure to comply with this requirement will be deemed a material breach of your contract and subject to all of the terms and conditions therein.
- 5) Alternately, you can show that your key field supervisory staff has completed another industry recognized OSHA 30-Hour Safety Certification training course within the past three years.

Note: If the certification expires any time during the course of construction when you are actively performing your work, you will be required to show evidence of successfully taking the TKN 30-Hour Safety Certification training for all key field supervisory staff. Any and all costs associated with the certification and/or re-certification will be required to be included in your base bid proposal.

Your proposal is to include the cost for complying with Turner's Substance Abuse Policy. This policy requires pre-employment drug/alcohol testing, post-incident drug/alcohol testing and drug/alcohol testing "for cause". The cost of each drug test kit is \$40. All workers must be tested upon completion of the project specific orientation program that will be conducted each morning prior to the start of the workday. All subcontractor supervisory personnel are responsible for ensuring their respective workers attend safety orientation to receive a drug/alcohol testing kit inclusive with a chain of custody. All drug/alcohol test kits shall be supplied by Turner Construction. The Trade Contractor is to include cost of all test kits for their workers in their Base Bid. Deductive change orders will be issued at reasonable intervals to reimburse Turner for the cost of the kits. In the event a worker does not return to the site with a valid receipt from the designated drug testing clinic, the cost to replace the drug testing kit shall be covered by the Trade Contractor. In the event a worker must be sent for additional drug/alcohol testing due to post-incident or "for cause", the Trade Contractor shall be responsible for the cost of each drug testing kit.

3.

Payment and Performance Bonds maybe required and are to be provided on the forms included in the bid book, through a Surety listed in the current Federal Register Circular 570 and California Civil Code 995.120, may be required. DO NOT include the cost of bonds in your base bid. The Subcontractor is advised NO PAYMENT will be issued prior to receipt of properly executed and verified Performance and Payment Bonds.

General:

Throughout the specifications, the word "Contractor" may be used. In all cases, unless indicated otherwise within this attachment, it should be interpreted to read. "Trade Contractor". This applies solly to the extent specification define Subcontractor. The Trade Contractor is responsible to provide each of its employees, and employees of

·b. tier-subcontractors, with ANSI-approved hard hats and protective eyewear. These items are to be worn properly at all times while the employees are within the confines of the

A consistent, single source of responsibility for fieldwork supervision will be required. C. Additionally, this individual will be required to attend weekly coordination meetings called by Turner's Superintendent.

Provide multiple move-ons as required to complete your work per the Preliminary Project

Attachment B Part 1 – 4 Parameters of Subcontract Proposal (Applies to all Trades)

Schedule.

Parking shall be in areas as designated by Turner's Superintendent. e.

There will be a limited amount of available storage on site. Coordinate with Turner's f. Superintendent prior to storing any materials.

Construction and emergency vehicle access must be maintained at all times. g.

ĥ. The Subcontractor is responsible for providing and paying for any other/oermits and fees necessary for completion of this work. Coordination of inspections with local and state agencies and the Owner's inspectors are the responsibility of the Subcontractorant Contra Government Ĭ. Provide all-layout, lines, surveying and setting of grades as required for the completion of

-Provide all field measurement as required to perform this scope of work.

j. k. Each Trade Contractor is to provide any and all flagmen, traffic control devices, etc., required for the completion of their work.

The Trade Contractor is to provide all temporary protection (weather, dust, safety, etc.) . which is required by or associated with this Work.

m. The rigging and hoisting of all material, equipment and debris is the responsibility of the Trade Contractor.

The Trade Contractor shall provide all scaffolding required for this work. n.

Include any task lighting required for this work. Night work to excluded I 0.

Each Trade Contractor is responsible for cleaning all mud, dirt, debris, etc., from their vehicles prior to them leaving the site. Streets are to be kept clean at all times.

-Confirm all-field conditions and perform all-field measurements prior to fabrication and 01 q.

All FOB items are to be delivered to the staging area location as designated by Turner's Superintendent and shall include off-loading. Turner will not have labor or lifts to offload any FOB items.

Attachment B

5.0 SCOPE OF WORK:

Complete Shoring System and Underpinning

- General Scope of Work: Provide ALL design and engineering, submittals, shop drawings, labor, materials, apparatus, tools, equipment, transportation, temporary construction, and special services as required for a Shoring system complete and Underplaning as called for in the request for pricing, and in this Attachment B.
- b. Specific Contract Documents: This Scope of Work includes all bidding Documents listed in the Atlachment A dated April 14, 2008_
- C. The documents listed above apply as related to the scope of work in this bid package
- d. Specific inclusions for this bid package are listed below.

5.1 PRECONSTRUCTION PHASE: The subcontractor will be responsible for engineering completely all items relating to the complete Shoring and Underpinning System and in completing a fully coordinated, code compliant set of construction documents, stamped by a Structural CN/1 Engineer licensed in the State of California, to be submitted to the Architect and Engineer for submission to OSHPD. Your engineered drawings shall contain complete information and the level of detail required to construct a fully coordinated and functioning Shoring and Underpinning System complete as required. Provide Error and Omissions Incurance per Attachment Cal Subconfra doi: SPECIFIC INCLUSIONS. Shall be covered through its General Listily policy.

Contractor to provide fully code compliant set of construction documents for submission to the AHds, containing a complete, functioning Shoring and Underpinning System including, but not limited to, all related reinforcing steel, shot-crete, piers and/or micro piles and related concrete for underpinning procedures.

MEETING PARTICIPATION AND STAFF REQUIREMENTS - CONTRACTOR will assign qualified; experienced staff to proactively participate in ongoing meetings as required by Turner Construction throughout the design coordination process to develop the final design and related documents.. CONTRACTOR to assign Pre-Construction Manager to lead the effort and serve as the single point of communication. CONTRACTOR to provide staff chart and work plan for all parties.

ENGINEERING AND DESIGN DEVELOPMENT - CONTRACTOR will fully engineer, C. coordinate and detail the Shoring and Underpinning systems with the following activities:

- Excavation (by others)
 - 2, Soil Anchors (If needed)
 - 3. Dewatering (by others)
 - 4. Rebar

DOCUMENT DEVELOPMENT AND REVIEW - CONTRACTOR will provide coordination for the submittal of a complete and fully detailed set of construction drawings for OSHPD permit approval for the shoring and underpinning only. These detailed drawings shall be fully coordinated with other trades and shop drawings shall include anchorage details and calculations, for permit approval by OSHPD, and ready for construction. No deferred approvals will be allowed.

SCHEDULING INPUT - CONTRACTOR to participate in collaboration with TCCo and all subcontractors in developing and updating on a continual basis the Pre-Construction and Construction Schedules. Provide written required sequence of construction to complete all work in occupied or complicated areas.

Turner = Healthcare

Mewill have a produption of labour B4

- f. LOCISTICS PLANNING CONTRACTOR will provide a drawing with parrative detail as necessary to fully develop access into and out of project site, including but not limited to the following:
 - Placement of Equipment
 - 2 Tree Protection Measures
 - Flagmen and Material Delivery
 - 4. Traffic Control Requirements Adherence
- g. COORDINATED SHOP DRAWINGS CONTRACTOR to coordinate their shop drawings with all other trades and systems, such as: waterproofing, concrete, structural steel, metal decking, miscellaneous metals, landscaping, etc.

5.2 CONSTRUCTION PHASE:

5.2.1 SPECIFIC INCLUSIONS:

- a. Provide shoring as indicated on the bidding documents provided to you.
- b. Shoring will be design-build by the shoring contractor. The shoring design will be reviewed by OSHPD. Provide design development documents within 20 working days of NTP, and final design documents that will be submitted to the State for permit within 10 working days of receipt of review comments on the preliminary drawings. Preliminary design submittal shall be detailed to a level where all depths and dimensioned locations of shoring are identified and coordinated with the demolition and structural drawings. The coordinated drawings-shall also take into-consideration the requirements of steel creation cranes and the resulting surcharge weight from such activities.
- The Shoring portion of the work is to be performed utilizing the geotechnical reports that are made available to the Contractor for information only. All such information is for reference and guidance to be utilized in the design.
- d. The site access and egress locations will be provided to the contractor prior to mobilization for this scope of work. Contractor will have sufficient access to perform shoring and underpinning work.
- e. Installation of tiebacks shall take place under the supervision of the Contractor's licensed engineer or his agents. All tieback-tensioning reports will be previded to the Owner's inspectors as the work progresses. The Contractor's licensed engineer shall be responsible to ensure the proper installation of the tiebacks and the shoring system in its entirety. The location of the shoring must take into account the tensioning hardware to insure that it does not conflict with the outside face of the foundation walls and the waterproofing membrane.
 - If any; Tieback caps and any other-items that may protrude through the face of the shot-crete system or the shoring system shall be reviewed and approved by the Waterproofing Contractor prior to application.

A shoring system that provides for a site that is clear of internal braces and obstructions in order to allow foundation concrete work and structural steel erection to proceed unimpeded is required. This shoring system must incorporate soldiers, lagging and tiebacks, or other systems that eliminate the need for any internal bracing within the construction area.

- g. The complete shoring system must remain intact until the completion of all foundation walls, steel erection up to the 1st floor, and required concrete cast in place to insure that all foundation walls are completely braced.
- h. Provide the following Alternates:

AL#1 – upon completion of the foundation walls, the shoring will remain in place. Provide a cost remove the top 2 feet of the shoring system.

A licensed engineer hired by and paid for by the Shoring Contractor shall review the findings at least once per week to validate the results and confirm that movement of the shoring/system is within telerances. The dailyresults from each measurement taken shall be reviewed with the Excavation Contractor and Turner Construction Superintendent at the beginning of each work/day. Any problems or discrepancies found with movement of the shoring systems shall be immediately brought to the attention of Turner Construction. These surveys will continue deily or until such time as Owner approves a reduction in the number required. - Contractor will perform an initial base line survey prior to the start of excavation. Once excavation begins, the Contractor will perform daily monitoring surveys (Monday through Friday only) to an allowance total of 30 work days. Surveys will need to continue beyond the timeframe of the completion of the work under this contract, but are excluded by the Contractor and will be performed by the Owner. The findings of the movement monitoring surveys will be provided to Turner for review by the Owner each Monday for the previous week's-daily-results measured against the baseline survey. メメ

Owner shall provide a California licensed surveyor to set all required survey and layout of coordinates and establish building control points. All lines, layout and setting of grades as required for the Contractor's work are the Schiractor's responsibility. The Owner will describe the Contractor's work are the Schiractor's responsibility. provide one (1) north-south baseline, one (1) east-west baseline and two (2) benchmarks for the Contractor's use. All other layout, line and level are the Contractor's responsibility.

The Contract includes the arranging for and paying for all temporary water and temporary phone service (If needed by this contractor) as required for this scope of work.

Contractor has read and understood the geotechnical and soils reports for the site and acknowledges no additional change orders will be allowed if conditions are not unusually different from said report findings.

Adherence to all local regulations as required by the AHJs (Authorities Having Jurisdiction), including, but not limited to calling for utilities location verification, notification and arrange for soils testing and inspection of work in place, and coordination with Turner Construction.

Temperary Fencing: Relocations for access, accommodations for your work, or repair of fence from exposure to CONTRACTOR's work is included. Temporary fencing will be installed by Turner; any repairs needed due to damage or relocations made necessary by this Contractor and the cost of said repair or relocations will be this Contractors responsibility.

Exclusions:

k.

- Safe off of existing utilities
- Dewatering
- Temporary fencing at perimeter of the site will be provided by Turner.
- Turner Construction will complete a pre-construction survey prior to the beginning of . demolition.
- Removal of earth will be by the excavation contractor. Coordination of excavation with shoring operations is a part of the scope of this work.
- f. Any hazardous materials abatement, including but not limited to lead paint, asbestos, PCB's, hydraulic fluids, freon, fuel tank decommissioning, etc. All abatement activities are by others prior to the start of this work.
- Cost of Permits (Shoring contractor shall be responsible for obtaining permits from the City) g.
- Damage to existing trees.

** Subcontractor shall perform its own BT monitoring Turner = Healthcare based on its own respirements. monitoring described herein shall be by object.

Add Prices

Bid Item	Description	Estimated Quantity	Unit	Ònit Prige	Extension
	Safety rail (maintenance and removal by others; based on minimum 200 lf)		lf	\$20 000	
	Bond (assumes warranty period does not exceed 1 year)			1% of final contract amount	

For the work described above, we will require the following by others (in addition to requirements described in our GENERAL PROVISIONS):

Ramp for duration of our work plus min. 50-foot wide bench for soldier piles, lagging and underpinning installation.
Water at normal city pressure and flow (see General Provisions for location).

• Utility location (plan and profile) along soldier beam line with potholing as required prior to our mobilization to the site.

• Layout of soldier beam locations (including hubs at center of drill holes, batter boards and recoverable offsets as necessary) and shoring wall-line. Layout Auden Livery 30' & COVERS

• Collection and removal of drill, concrete and water spoils from our drilling operations.

• Collection and removal of our underpinning spoils in a timely manner so as not to delay our work.

De-watering of the site to at least 2 ft below the bottom of the underpinning piers and subgrade prior to our commencing work.

On-site debris box OLW b'

Bench shall be maintained firm, level, and dry, by others. If necessary, mats, cribbing, rock surfacing of benches and ramps so our equipment can move under its own power.

• De-activation, sheathing or re-location of any overhead power lines to allow installation of soldier beams.

Removal of existing building (the one scheduled to be demolished), fences, asphalt, concrete or other obstructions prior to our mobilization.

Washout area and basin for concrete

OSHA rail and toe board (see add price). K-rails or other rails that may be subjected to vehicular loads shall be installed by others.

Acquisition of permits; pre-construction damage survey.

Schnabel Foundation Co., Page 3 of 10, May 5, 2008 Northern Inyo Hospital, Bishop, CA Proposal for Temporary Shoring and Underpinning

The following are additional assumptions and/or conditions:

- Maximum depth of excavation is 6 ft.
- Scaling dimensions and elevations where not explicitly shown on plans. We have assumed that the 11x17 drawing e-mailed to us 3/28/08 is at 1" = 30 ft.
- That no underpinning is required at the Central Plant.)
- We will drill as close as is safely possible to the existing roof overhang.
- That underpinning is limited to a 20 lf wall length as shown on the 11x17 drawing e-mailed to us 3/28/08.
 - That underpinning piers will not exceed 5 ft in depth. See our attached sketch, sk-4, that shows assumed condition (including assumption about crawl space).
- That existing footings, except at underpinning locations, are outside 1:1 line from bottom of excavation (see attached sketch, sk-3).
- . That construction will be no later than summer 2008.
- Shoring wall not designed for water pressure (i.e., back of wall is dewatered).
- Subcontract terms and schedule to be mutually agreed to.
- That surcharge loading, other than at underpinning locations, does not exceed 250 psf. Special loading conditions will need to be addressed case by case; there may be price impacts.
- If the shoring will be used as a back-form for a wall pour (or shotcreted wall), the shoring will be placed to a tolerance of 0" to 2"; the concrete contractor should accordingly figure 2" of additional concrete or shotcrete in excess of the design thickness to account for the shoring placement tolerance where the shoring is used as a back-form for the new basement wall.

Specifically excluded from this work are (in addition to exclusions described in our GENERAL PROVISIONS): responsibility for damage to utilities or other improvements not shown on plans (in plan and elevation) or shown incorrectly or inadequately on plans; videos, photography; surveying, safety rails (see add price); permits other than OSHA permit; waterproofing or facilitating waterproofing; CG 20 10 11 85 Additional Insured form (we will provide our own form); allowances for unforeseen conditions; any costs associated due to working with, handling, transporting or disposing of contaminated or hazardous materials and manmade obstructions; wrap-up deductible; architectural damage; responsibility for damage to our work caused by others; indemnification, defense or insurance of you or any other party other than to the extent of our negligence; separate errors and omissions insurance policy (our design coverage is included in our general liability policy); structural engineer's stamp (we will provide civil stamp).

Schnabel Foundation Co., Page 4 of 10, May 5, 2008 Northern Inyo Hospital, Bishop, CA Proposal for Temporary Shoring and Underpinning

This proposal is based upon a normal five-day work week of eight hours per day and one mobilization, unless noted otherwise in the Scope of Work above.

Additional Mobilization: <u>\$\scrt{cost plus 25\% for each}\$</u>

If we are delayed due to man-made obstructions or "by others", the following rates shall apply Install soldier beams: <u>\$\sqrt{900}\$</u> per hour per rig

Install temporary lagging, underpinning: \$500 per hour per rig

This offer to perform the stated work is based solely on this proposal and the attached GENERAL PROVISIONS, and no other document(s), and is valid for Thirty (30) days from the above date. Due to circumstances beyond our control in the steel, cement, and fuel industries, we reserve the right to adjust our bid to reflect price increases if necessary. If there is any conflict with this proposal and any bid documents, this proposal shall govern.

ACCEPTED.

GENERAL PROVISIONS

The Scope of Work and Prices detailed in this proposal are based upon all of the GENERAL PROVISIONS listed below:

- 1. COORDINATION You shall coordinate the project so that the work can proceed in an orderly, productive and continuous operation. For the items listed, the following will be provided to us free of charge: (A) Soldier Beams excavation to the tops of the soldier beams shall be completed prior to the start of placing soldier beams, layout of the soldier beams; (B) Lagging excavation to the back face of the lagging; (C) Underpinning excavation to the top of the footing shall be completed prior to the start of underpinning work; (D) Tiedowns the work surface shall be maintained firm and dry; (E) Soil Nailing the excavation shall be made to within one (1)-inch of the back of shotcrete line; (A-E) Additional work required due to over excavation shall be paid as an extra to Schnabel. Additionally, we shall be provided free of charge: Excavation in approximately five (5)-foot lifts (or less if the soil will not stand open); rock excavation so as not to undermine or otherwise damage our work; a berm around the top of the excavation to prevent overtopping of the retention system by water or debris; safe access for our personnel, equipment and concrete trucks moving under their own power to and from each work location; access includes furnishing, placing and maintaining dry, level, firm benches (as specified in the Proposal); and ramps with mats, gravel or other surface materials as required throughout the project. Benches are to be slightly sloped away from any work area, in order to prevent ponding of water, and are to be wide enough for safe operation of our personnel and equipment, and as specified in the SCOPE OF WORK.
- 2. TEMPORARY SERVICE ¥ The following will be provided to us free of charge: 220-volt, 200-amp single phase, 110-volt, 40-amp electrical power, and water under normal city pressure, with all outlets and connections to be located within 200 feet of any work area; job toilets; watchmen services; space for a job trailer 10'×40' in size; space for fabrication and storage of material to be used in job; spot grades and elevations around the job; and see SCOPE OF WORK for any additional services required.
- 3. PLANS AND PERMISSION ¥ For any Schnabel Foundation Company design, a detailed plan will be furnished, signed by a licensed engineer, showing the original plan on which this price is based. Changes will be made as you request, or as necessary to obtain approval of others, but if such changes result in changed costs, the price shall be adjusted accordingly. Permission to close portions of public space will be obtained by others, as will permission to do portions of this work, including tieback or soil nail installation, on adjacent private property.
- 4. LABOR \(\forall \) We propose to do this job using union labor, and should labor trouble prevent us from completing this contract, we will be paid for the cost of all work performed to that time, plus a reasonable amount for overhead and profit.
- 5. UTILITIES \(\frac{1}{2}\) The following shall be performed by others prior to commencement of our work: power lines closer than legally permissible are to be removed, sheathed or de-energized; utilities along the shoring line are to be uncovered and located, then relocated, resupported or removed, as required to prevent interference with our work.
- 6. EXCLUSIONS ¥ This price does not include any expense or work in connection with the following: excavation (except for underpinning); concrete (except for soldier beams and underpinning); collection and removal of debris and

spoil (including shotcrete rebound) from any work location and the site; removal of overhead or underground mammade obstructions, old footings and footing projections; backfill, tamping, restoration, line and grade work, monitoring, demolition; pumping and site dewatering (including pumping rain water); treated wood; fences, stairways, barricades and handrails; traffic control and flagmen; street cleaning; protection and maintenance of slopes, benches, berms and shoring; fees, permits, deposits, and bonds; liquidated and consequential damages; liability other than for our own negligence, and for negligence of our subcontractors; and, material testing and inspections other than per our design; removal of any of our work. See SCOPE OF WORK for any additional exclusions.

- 7. CHANGE ORDERS ¥ Change orders will be in writing and subject to advance approval by Schnabel Foundation Company as to design and price before performing changed work. No back charges will be issued nor accepted unless 72 hours notice in writing of a condition requiring correction is given with an additional and reasonable amount allowed for its correction.
- 8. INSURANCE \(\) We will indemnify you for damages caused by our negligence. We will maintain the following insurance: a) Workers\(\) Compensation limits established by state law; b) Commercial General Liability in occurrence form limits of \(\)1.5 million (bodily injury and property damage combined per occurrence), \(\)3 million (general aggregate), and \(\)2 million (completed operations aggregate) including XCU hazards; c) Auto Liability limits of \(\)1.5 million each accident (single limit bodily injury and property damage combined); d) Umbrella Excess Liability limits of \(\)1 million. Additional coverage and limits requested by you, if available, will be provided at cost.
- 9. PAYMENTS \(\forall \) Our price is based upon payments being made by you to us by the 10th of the following month for 95% (or more if stated in the specifications) of all work done the preceding month, including materials delivered to the site or stored in Schnabel's yard, irrespective of whether you have been paid for such work. Final payment to us, including all retainages, will be made by you to us 30 days after substantial completion of our work stated above, irrespective of whether or not you have been paid for such work. If there are later phases, such as ramp removal or other similar items to be completed at a later date, they shall be treated as separate jobs with an agreed to value withheld, and no other retention will be withheld. Interest at the rate of 11/2% per month, or the applicable legal maximum rate if more, shall accrue on all amounts not paid by the times provided above, and shall be paid by you to us monthly. Additional work performed by Schnabel shall be included in monthly progress estimates and paid monthly, without retention being withheld. No charges of any kind are to be made against Schnabel's account unless they are agreed to and signed by Schnabel Foundation Company. In the event any amount due as above provided is not paid when due and we commence legal proceedings to enforce payment, you shall be liable to us for all costs of any such legal proceedings, including reasonable attorney fees based on the time expended by our attorneys. If we are not paid within 30 days after the due dates as above provided, we may suspend work (without liability for damages resulting from such suspension) until we have been paid in full for all amounts which have not been timely paid, including amounts coming due during such suspensions, and the costs of demobilization and remobilization.
- 10. ACCEPTANCE \(\forall \) This proposal may be accepted by your signature, orally, or written notice to us, that you wish us to perform the work covered hereby, or by asking us to proceed with any part of the said work. Upon acceptance, a contract will exist incorporating the terms hereof. If you wish to use a different form of contract, then we would be pleased to negotiate a contract with terms consistent with this proposal and other mutually agreeable terms.

ATTN: TURNER CONSTRUCTION (MIKE PENNY)

RE: DESIGN / CONSTRUCT TEMPORARY SHORING PROPOSAL

PROJECT:

NORTHERN INYO HOSPITAL

BISHOP, CA

BID DATE:

5/1/2008

Please find herein DTDS's proposal to furnish labor, equipment and material to construct the listed items below for the referenced project in accordance with the Contract Plans and Specifications subject to stated Terms and Conditions and attached Standard Conditions (shts. 1-4).

A. PRICING:

Annoy 370 ft. loog and 6 feet tall along existing hospital building.

Γ	ITEM NO.	CODE	TÉM	UNIT OF MEASURE	EST. QTY.	UNIT	TOTAL PRICE
	1	N/A	Construction Temporay Shoring System	SF	2,220	\$104.92	\$232,922.40
Γ	2	N/A	Design Temp. Shoring System	LS	1	\$10,000.00	\$10,000.00
Γ	3	N/A	Underpinning of Existing Tunnel	ı,s	1	\$21,000.00	\$21,000.00

B. ADDENDA NOTED:	

C. SPECIAL CONDITIONS:

We have based our estimate upon the demolition plans provided, sketch #1 dated 4/14/08 prepared by Turner Construction and geotechnical investigation performed by Converse Consultants. The above bid assumes approximately 370 feet of shoring along the existing hospital buildings as was laid out in Sketch #1. The shoring is to be 6 feet deep. DTDS will require information detailing the existing footing sizes, depths, loading etc... of the existing adjacent buildings to complete a shoring design. DTDS has based our turnel underpinning pricing on the area identified on Sketch #1. The pricing is based on underpinning a 10 to 12 foot wide footing below the turnel. DTDS has not included any pricing for internal bracing of the turnel.

TOTAL:

\$263,922,40

2 This pricing is based on one mobilization to the site with all work available in continuous manner

3 Construction of Shoring System

Furnish design by CA registered professional engineer

Furnish working drawings for approval

Furnish and installation of all shoring elements

4 Tunnel Underpinning

Furnish design by CA registered professional engineer

Furnish working drawings for approval

Drilling of underpinning elements

Construction of temporary underpinning grade beam beneath existing tunnel footing

Tie grade beam into underpinning elements

5 The following support items are to be provided or furnished by others at no cost to DTDS:
All surveying needed for layout, lines, grades, and elevations of shoring wall

Complete de-watering of excevation prior to shoring installation

Water runoff and erosion control (SWPPP), construction site drainage, dust control

Potable water or equivalent (city press. approx. 50 psi) within 100 ft of work area

All treffic control, advance warning signs, barricades, cones / delineators, k-railing, flagging, etc.

All essements and permits for retaining wall including the costs in obtaining permits and easements

Contract plans, inspection (including deputy and special inspection), and testing of materials

Manitoring of shoring wall system, adjacent buildings, and tunnel

All survey, control points, grades, and elevations of retaining wall system and drainage

All utility locations, relocations, removals or support (overhead and underground) including pot-holing

2200 Wymore Way • Antioch, CA 94509-8548 • 925/978-2060 • Fax: 925/978-2063 22223 Forest Boundary Road • Corona, CA 92883-4956 • 951/277-9700 • Fax: 951/277-9701

Forming of top of wall above existing grade All asphalt and concrete removal / replacement Removal of drill spoils and shotcrete rebound including interim handling to stockpile and disposal All hazardous material handling, removal, and disposal On-site concrete washouts and equipment cleanout pits including clean-up and disposal of washouts Potable water or equivalent (city press. approx. 50 psi) within 100 ft of daily work area Safe, productive, and level access as required by DTDS for equipment, concrete trucks, and crew at daily construction area (20 ft wide minimum) Offinaul and disposal of spoils generated from DTDS operations including on-site dumpsters Adequate on-site staging and storage area as needed by DTDS for equipment and materials Temporary and/or permanent fencing / railing along the top of walls Responsibility of safety railing monitoring and maintenance once DTDS has demobilized Structural Plans and or information relating to the existing building footings adjacent to the shoring Structural Plans and or information relating to the existing tunnel design and footings to be underpinned Internal bracing of the existing tunnel. DTDS price includes underpinning only. Materials on hand to be paid within 30 days of order and invoice date.

Design to be paid within 30 days of approval - \$10,000 (incl. in above quote) Mobilization to be paid 30 days from DTDS mobilization to site - 10% of Contract Total 7 Scheduling: DTDS requires three weeks written notice after approval of submittals prior to our mobilization onto the project. Upon issuance of subcontract, the contractor is to provide DTD\$ with a mutually agreed upon project schedule. 8 Payments: The Prime Contractor / Owner is to make progress payments to DTDS in monthly installments for the work completed that month. Monthly progress payments to be made within 30 days of DTDS' invoice, regardless of payment from owner or financing entity, or 10 days upon receipt of payment from owner or financing entity, which ever occurs first. The maximum allowable retention to be held on DTDS' work shall be 10% of value of work performed and shall be reduced to 5% of the value of work performed upon completion of 50% of DTDS work. All retention held on DTDS' work is to be released within 45 days upon substantial completion of our work regardless of release by owner or financer. Additional cost for bonding, if required, will be 1% of final subcontract amount D. BOND COST: See attached sheets 1 through 4 E. STANDARD CONDITIONS: Please contact us if you have any questions about this quotation. Accepted By: Very Truly Yours, Drill Tech Drilling & Shoring, Inc. License #745354 A Staneture Namo & Title Shawn McNamara

License No. & Expiration

Attachments: 1. DTDS Standard Conditions- Drilling (shts 1-4)

DRILL TECH DRILLING & SHORING, INC. (DTDS) STANDARD CONDITIONS OF DRILLING BID PROPOSAL

PROJECT BID DATE: 5/7/09
PROJECT NAME: Northern Inyo Hospital

The attached proposal is based upon the following qualifications, exclusions, conditions and requirements unless specifically stipulated to the contrary in our cover page(s). These Standard Conditions shall be incorporated into our contract. Should these Standard Conditions be at variance with the Plans, Specifications or Conditions of the Project Documents for the noted project, these DTDS Standard Conditions shall take precedence and the purchaser should consider such conditions in preparing its proposal to and contract with the Owner.

1. ACCESS, STAGING, OBSTRUCTIONS:

- A) It shall be the responsibility of the Owner and/or Prime Contractor to provide safe unobstructed access for all personnel, equipment, material and concrete trucks moving under their own power to and from each DTDS work location. Access includes ladders and stairways, as well as furnishing, placing and maintaining dry, level, firm benches, ramps, mats, gravel, etc., or other surface materials throughout the project. Access to each location shall be 20'-0" wide with appropriate access provided at the actual drilling location for our equipment.
- B) It shall be the responsibility of the Owner and/or Prime Contractor to provide the identification, protection, location, relocation, removal, rerouting and/or repair of all pavement, sidewalks and utilities, underground or overhead, overhead wires, ducts, pipelines, conduits, and other obstructions, etc., in the project area and on adjacent property, so as to prevent any interference with any phase of DTDS's work.
- C) Unless negligent, DTDS assumes no responsibility or liability for cracking or settlement of any existing streets, sidewalks, curbs, gutters, utilities, pavement, buildings, or any other damages which may occur during installation of the work or which may be caused by vibration of machinery or equipment.
- D) It shall be the responsibility of the Owner and/or Prime Contractor to provide site dewatering prior to the start of work so as to prevent hydrostatic head and not delay the progress of DTDS's work. Where DTDS is pumping water and/or drilling fluids from drilled shafts, it shall be the responsibility of the Owner and/or Prime Contractor to provide a sump within 100 feet of each location. Should tanks or desilting basins be required, they are to be furnished, cleaned, and the material contained therein removed by others with no delays to the drilling operation at no cost to DTDS.
- E) It shall be the responsibility of the Owner and/or Prime Contractor to provide hoisting of materials and equipment, if required, due to lack of adequate access.
- F) It shall be the responsibility of the Owner and/or Prime Contractor to provide suitable on-site areas for DTDS's office, storage of materials and equipment and fabrication of materials.
- G) It shall be the responsibility of the Owner and/or Prime Contractor to provide lane closures, public safety measures and protection including all labor (flag persons, flashers, etc.) and equipment, lighting, street cleaning, barricades, fences, or handrails, including relocation as required.
- H) Drilling access to shafts is to be provided prior to beam or cap excavation or agreed to in writing. DTDS will not be responsible for cleanup of drill spoils from pile caps or for retrimming or fine grading bottom of cap. DTDS will not be responsible for cleanup of sloughage from side walls of the cap or for overbreak concrete of neat pile cap excavation. Excess concrete and removal of same above cut off on shafts installed through overburden will be by others.

2, SURVEY:

A) It shall be the responsibility of the Owner and/or Prime Contractor to provide and maintain all required field engineering, surveying and layout, including clearly marked center lines, grade, offset stakes, and elevations at each hole location and maintenance of same.

3. INSPECTION:

- A) It shall be the responsibility of the Owner and/or Prime Contractor to provide all required soil, concrete and materials testing, inspection and/or system monitoring, permits, surveys, easements, permission to encroach, reports, as-built drawings, required notices, licenses and bonds.
- B) If improvements are tested and are indicative of anomalous conditions DTDS will repair same at our cost. Should physical investigations indicate that no anomalous conditions existed then DTDS shall be compensated for all costs of investigation and repairs at cost plus 20%.

4. SCHEDULE:

- A) It shall be the responsibility of the Owner and/or Prime Contractor to coordinate the work of all the other contractors, subcontractors, and material suppliers so as not to hinder, interfere with or delay DTDS work.
- B) We will cooperate with the Owner and/or Prime Contractor to prepare a mutually agreeable production schedule. Due to many unknown factors inherent with underground work, we do not guarantee to meet the production schedule should differing site conditions be encountered nor will we accept financial responsibility for not meeting the production schedule, including without limiting the foregoing the payment of liquidated damages, unless we fail to make a reasonable effort.
- C) This proposal is based on working a five (5) day work week Monday through Friday from 7:00 AM to 5:00 PM. Additional shifts or overtime work necessitated by delays not of DTDS's cause will be compensated on a time and material basis at cost plus 20%.
- D) We will assume no responsibility for delays caused by occurrences beyond our control such as, but not limited to, acts of God, actions or non-actions of Owner or Owner's agents or employees, including Architects and Engineers, Prime Contractor or other contractors on the project, labor disputes, transportation delays, inclement weather, inundation of the site, serious accident or damage to our equipment, acts of public utilities or public bodies, extra work, significantly different subsurface conditions from that shown on plans, specifications or soils report, failure of Owner and/or Prime Contractor to make progress payments, or other contingencies unforescen by us and beyond our reasonable control.

5. CHARACTER OF THE WORK:

- A) We have relied upon the project's plans and specifications for bidding purposes, should conditions be encountered in the performance of our work which differ significantly from those indicated by the contract documents or soils data furnished to us, we shall be entitled to additional time & compensation for any and all variances. This is exclusive of whether the Prime Contractor (if any) obtains similar complementary relief from Owner. If our work extends deeper than soil borings, or outside of area explored by soil borings, we have assumed that the material to be encountered is similar to that which is indicated to the depth explored and within the area explored. Should this not be the case, we will be entitled to additional time and compensation on a time and material basis at cost plus 20%.
- B) Unless specified otherwise, only conventional auger tools will be supplied. Work items such as rock drilling, coring, dewatering, hand mining, hand cleaning, casing of shafts, shoring of bells, as well as the repair of drill rigs, drill tools, and casing (damaged as a result of rock drilling or coring) will be extra work.
- C) Unless otherwise specified, the removal of obstructions that interfere with DTDS's work shall be extra work. Obstructions are defined as any material, which cannot be drilled at a rate of 1 foot in five minutes with a conventional earth auger and/or under-reaming tool. The use of special rock augers, core barrels, air tools, blasting, hand excavation and /or other methods of excavation, if necessary, will be extra work compensated on a time & material basis at cost plus 20%.

6. ITEMS FURNISHED BY OTHERS:

- A) It shall be the responsibility of the Owner and/or Prime Contractor to provide all water, lighting, telephone service, sanitary facilities and electrical power, in such quantity and quality as required by DTDS, within 100 ft. of each work location.
- B) It shall be the responsibility of the Owner and/or Prime Contractor to provide continuous removal and disposal of all spoils (incl. segregation), drilling fluids, water contaminated with polymer, waste materials, debris, excess concrete and dunnage, so as not to interfere with or delay the progress of DTDS's work. Drilling subcontractor accepts no responsibility for overrun quantities.
- C) Reinforcing steel is to be furnished by others, staged at locations adjacent to shaft locations at no cost to DTDS. All cages will be adequately tied with spacers and adequately braced so they will retain their shape during handling, placing of concrete, and casing withdrawal. DTDS will place these cages with its own personnel. If cages cannot be placed in one continuos length and require splicing, Owner and/or Prime Contractor shall furnish ironworkers or other crafts as required for such splicing at the expense of others.
- D) Concrete, approved by DTDS and furnished by others, is to be delivered to each drilled shaft location by the time drilling of the shaft is completed. All concrete to be placed per ACI 336.1. Owner and/or Prime Contractor shall furnish concrete mix designs appropriate for the drilling conditions encountered. Placement of concrete by pump is excluded from this proposal. Drilling subcontractor accepts no responsibility for everrun quantities.

6. ITEMS FURNISHED BY OTHERS (Cont.):

- E) In order to eliminate unsafe conditions, all shafts which are not completely filled with concrete are to be covered by others. DTDS shall not be responsible for any portion of a shaft left open or not backfilled, to include top of concrete cutoff below grade, in which case the furnishing and placement of backfill material is required. All of the foregoing work is to be done by others at no cost to DTDS.
- F) Forming, placement of dowels, anchor bolts, keys or sandblasting, or any work above existing working grade is excluded. If the tremie method is used, any remedial work including but not limited to removal of excess concrete above cutoff is excluded.
- G) Supplemental support of cages, which extend beyond the drilled shaft concrete cut-off elevations will be furnished and installed by others.

 Access for concrete placement within cages which extend more than 5'-0" above the drilled shaft concrete cut-off elevations will be furnished by others.

7. HAZARDOUS OR CONTAMINATED MATERIALS:

A) DTDS shall not provide services with regard to the removal or disposal of hazardous substances or contaminated materials. Owner/Prime Contractor shall have sole responsibility for investigating the existence and location of hazardous substances or contaminated materials at the project site and furnishing all tests, inspections, warnings, notices, or posting required by law.

The encountering of any hazardous substances or contaminated materials shall be a differing site condition. If a hazardous substance or contaminated material is discovered, DTDS shall stop the work affected, notify the Owner/Prime Contractor, and have no obligation to perform investigation of remedial work. The Owner/Prime Contractor shall promptly investigate the condition and make all required determinations, and actions. If DTDS agrees to proceed, the Owner/Prime Contractor shall provide insurance and give written direction to DTDS relating to completion of work under contract. DTDS shall be entitled to a time extension for the delay and compensation for all costs incurred, including but not limited to, the additional costs of performing contract work, extra work, delays, suspension of work, safety measures, etc.

Owner/Prime Contractor agrees to indemnify, hold harmless, and defend DTDS and its owners, officers, employees, and agents from and against any liability, claim, loss, penalty, damage, expense (including legal and expert expenses) or legal or administrative proceeding brought by any other party including any governmental or regulatory authority arising out of the existence, encountering, handling, transportation, disposal, release, response, remediation, or removal of the hazardous substance or contaminated material.

As used herein, hazardous substance or contaminated material shall be interpreted broadly to mean any substance, material, or waste encountered during the course of performance defined or designated as hazardous, toxic, or otherwise dangerous to human health, property, or the environment by any governmental or regulatory authority.

8. INSURANCE, INDEMNIFICATION, BONDS, TAXES:

- A) DTDS shall maintain in place during the performance of it's work hereunder, worker's compensation coverage as required by law, bodily injury and property damage liability insurance (XCU exclusion deleted), with a combined single limit of \$1 million. "Additional Insured" coverage thereunder is limited to DTDS's proportionate share of the total fault causing the loss or damage on which such claim is based. Coverage afforded shall be Type III. For additional insurance requirements beyond that mentioned above, the total additional cost and premiums required shall be solely born by the Prime Contractor and/or Owner.
- B) DTDS shall indemnify Prime Contractor (if any) and Owner with respect to any claim which arises directly from the negligence, if any, of DTDS in performance of it's work hereunder, but the extent of such indemnity shall be only in proportion to DTDS's share of the total fault causing the loss or damage on which such claim is based. DTDS shall have no other responsibility to defend, indemnify or provide insurance for Prime Contractor (if any), Owner or others with respect to claims arising from or related to DTDS's work hereunder.
- C) Additionally Insured endorsements and Primary Wording shall be as per our Insurer's CG 20 10 11 85 form. Request for revisions may incur additional premiums to be paid by others.
- D) A bond will be furnished if required with premium to be paid by others.
- E) Unless specifically indicated, this quotation does not include any local, state, federal or governmental agency taxes, including sales tax.
- F) Requests for waiver of subrogation not contained within the Owner's contract documents will be furnished upon request with additional premiums to be paid by others. Where such waivers are identified they shall be applicable only to the Owner and their agents. Such subrogation will not extend to the General Contractor, their Subcontractors, Suppliers or Agents.

9. DELAYS, LIQUIDATED DAMAGES, BACKCHARGES:

- A) No charges of any kind to DTDS will be accepted unless agreed to and signed for by an authorized representative of DTDS on a daily basis. Should damages be incurred which are the responsibility of DTDS, DTDS must be notified in writing and have an opportunity to resolve same with our own forces.
- B) No liquidated damages may be assessed without DTDS specifically agreeing in writing. DTDS shall not be responsible for any consequential or incidental damages. Should liquidated damages be agreed to in writing, the amount assessed will be limited not to exceed our subcontract value less materials.
- C) Unless specified otherwise, extra work items of work specifically excluded but performed by DTDS, or delays resulting from interference or non-performance of others, shall be invoiced at cost plus 20%.

10. PAYMENTS

- A) During the work, monthly progress payments are to be made for materials delivered and work performed up to the 25th day of each month. These progress payments shall include costs for all materials purchased and/or fabricated, but not installed and shall be invoiced and submitted to Owner and/or Prime Contractor for approval and processing. Payment by Owner and/or Prime Contractor shall be received by us no later than 30 calendar days after the date of each submission regardless of whether payment is received from Owner or funding agency. Interest will be charged on all past due accounts, at the maximum rate allowable by law. Full payment for DTDS work is to be made within 45 days after substantial completion of our work. There is to be no retention withheld from this final payment. If there are phases or ramp removals, they shall be treated as separate jobs with an agreed-to value withheld. Owner and/or Prime Contractor's retention of progress billings due DTDS under contract.
- B) For pay purposes, drilling depths are measured from the bottom of drilling unit's tires/tracks to the bottom of the drilled shaft.
- C) For deductions in scopes of work, credits back for eliminated work will be made at an adjusted unit price, which will be less than the bid quote unit price.
- D) The add/deduct unit prices for any individual drilled shaft shall apply only when the variation from prescribed length does not exceed 15%.
- E) The acceptance or rejection of a drilled shaft is to be upon immediate completion of the shaft including the placement of rebar and concrete. Changes made after acceptance will be at extra cost.
- F) The removal of any materials once installed is excluded, unless such work is covered by bid item.
- G) This proposal price is based on performing our work in one continuous, uninterrupted operation with only one move on and off the site unless specifically noted otherwise. Each additional mobilization beyond one or that established in DTDS's proposal will be charged at \$ 12,000.00 Per each additional Mobilization.
- H) Owner and/or Prime Contractor shall compensate us for delays of our work on a time and material basis as if the delay constituted extra work. Standby and delay time will be charged at

\$ 875.00 Per hour for Equipment with Crew. \$ 425.00 Per hour for Equipment.

11. CLAIMS, ARBITRATION:

- A) Any controversy or claim arising out of or relating to this contract, or the breach thereof, shall be settled by arbitration in accordance with the Construction Industry Arbitration Rules of the American Arbitration Association, and judgment upon the award rendered by the Arbitrator(s) may be entered in any Court having jurisdiction thereof.
- B) In the event action must be instituted to enforce payment, or any other rights under this agreement, the Prime Contractor agrees to pay DTDS's attorney's fees and costs, which specifically include the cost of experts.

12. CONTRACT CONDITIONS:

- A) These conditions shall be attached to and become part of the contract and shall take precedence over any conflicting conditions or statements.
- B) Modifications to these conditions or exclusions must be specifically described and initialed by an authorized representative of DTDS.

13. TIME OF ACCEPTANCE:

A) Unless specified otherwise, this bid quotation shall not remain in effect after 30 days of the bid date unless accepted in writing or by Contract.

2009 Budget Narrative

The budget for 2009 calls for the first budgeted reduction in Net Income in several years. This is primarily due to:

- 1. The incurrence of higher operating costs associated with the building program. The largest of these expenses are the depreciation (\$430,890) on the two new completed building and the leases on the temporary buildings (\$502,713).
- 2. A decline in interest income due to general market conditions.

Nonetheless, the budget will produce the \$4,874,702 cash flow to fund the building project and current capital requirements.

This year as in the past we will not review detailed departmental budgets in favor of approving the assumptions used in constructing those budgets. Management then is requesting the Boards' approval of the submitted budget with its attendant assumptions to specifically include:

- 1. A 2% Cost of Living Adjustment for all pay grades effective the first pay period in July.
- 2. The normal Sep increase for eligible employees including the expanded step program discussed in Assumption #7.
- 3. A 6% across the board rate increase and a .5% focused rate adjustment described in Assumption #10.
- 4. Annual Capital expenditures of 1.498M.
- 5. The annual Operating Budget of \$79,019,342.

Northern Inyo Hospital Budget Assumptions

2009 Budget

1. There is no change in-patient activity budgeted for FY 2009. (Current YTD Average Daily Census is 9.63) Daily total patient census will average 10.0 patients per day, categorized as follows:

a.	Med/Surg/Peds	2367 Annual	6.46 Daily Average (2566)
b.	ICU	327 Annual	0.9 Daily Average (312)
c.	OB	483 Annual	1.32 Daily Average (427)
d.	Nursery	483 Annual	1.32 Daily Average (427)
	•	_	

e. RHC 1200 visits per month

2. There will be no budgeted change in the payer mix or services from current operations.

3. Other Operating Revenue will include \$786,490 from the District for Debt Service payments on the 2005 General Obligation Bond.

4. The cost of supplies, purchased services and miscellaneous expenses will increase at a 5% inflation rate.

5. Displacement of various Departments will require additional manpower in the following areas: Registration and Lab.

- 6. Wages and salaries will be increase by 3.5% for cost of living adjustments (2% effective 7/6/2008 and 1% 1/4/2009) The second of these will be reviewed as last year and be dependant on performance to budget and actual increase in the Cost of Living. Total wages will increase an additional 1.8% for anniversary (step) increase and wage adjustments. Approximately 30% of employees are eligible each year for step increase. It is expected that employee benefits will run about 57% of Wages and Salaries, as is currently the case.
- 7. There has not been a general "adjustment to market" for non-clinical management for over eight years. (Clinical managers have received adjustments that were driven by their clinical specialties). As a result many managers are being compensated at less than the benchmark of the 50th percentile of available survey data used by NIH. This situation was either created or exacerbated by the fact that a significant number of mangers have been "maxed out" at step five for many years, a few for over ten years. A general realignment of management can be a huge undertaking and

occasionally be very expensive. Significant and equitable relief can be achieved by the simple removal of the Step 5 limitation and creating a Step 6 and 7 for all management pay grades and moving the few managers that are not on the management pay scale to the management pay scale. This approach has the advantages of avoiding the huge and occasionally controversial realignment process, minimizes the cost of providing relief for the next two years, provides a benefit to all managers, and is spread out over the budget year. The annualized cost of this approach is \$84,204.

8. The hospital's operating reserves (not including the building fund(s) will increase to at about \$27,000,000, producing a budgeted interest income of \$720,000 (2.6% yields.)

9. Capital expenditures will be budgeted at \$1.5M excluding the building project related capital purchases.

10. A 6% across the board rate increase (effective 7-1-2009) and other focused rate adjustments that would net another .5% in net increases.

11. This budget includes the lease expense of the temporary buildings (modulars) of \$502,713.

12. This budget includes the added depreciation of the two new permanent buildings of \$430,890.

13. This budget produces approximately \$4,874,702 of cash flow. (See table 1)
